The Coleman Journal

Most Effective Advertising Medium reaching the People of Town and District. The Journal goes into the Homes.

Volume 24, No. 51. THE JOURNAL, COLEMAN, ALBERTA THURSDAY, MAY 2, 1946. \$2.00 Per Year; Single Copy 5c

COUPON CALENDAR

Note: On May 2, sugar-preserves coupons S8 to S12 inclusive are valid for the purchase of the first five pounds of sugar for home-canning purposes, at the rate of one pound of sugar per coupon. The coupons may be used to purchase commercially prepared preserves or other rationed sweet spreads at the usual rate per coupon.

Teachers Seek Boost In Salaries; School Inspector Asks That Lime Works Be Brought Into District

Rock Wall To Be Built Around School Property; Bicycle Rack To Be Built For Students.

Regular meeting of the school board was held on Tuesday evening. Present chairman Evans, trustees, Ash, Holly, McNeil and Vasek.

It was agreed that May 1 would be a holiday for the school children. The children would attend school in the morning for registration purposes and then be discharged for the day.

A letter of thanks was received from Mrs. Isobel Seaman in appreciation of the board's co-operation in allowing the PT classes the use of the school auditorium.

Inspector E. W. Hinman was present and discussed with the Board the advisability of including Summit Lime Works into the school district. It is understood that there are at present two youngsters of school age at the lime plant. It is also understood that Crows' Nest school, where the plant youngsters at present attend, is scheduled to close shortly. The Board refused to act on the matter at the present time.

Frank Coccione, local taxi driver, was present to seek permission to make tender on the taxi service sponsored by the Board to transport children from Sentinel to the local schools. He was asked to tender his bid prior to the opening of the Fall term.

The Board received a request from the local ATA wage schedule committee to meet them to discuss

revision of salary schedule in operation at the present time. The Board will meet the committee on the 13th of the present month to discuss with the committee proposed schedule.

A letter was received from Mr. Graeme Howarth asking that a second year's leave of absence be granted him. His request was refused. Should the Board open the general work shop in the Fall applications for the position will be sought. Mr. Howarth is to be given the same opportunity as any other person in making application for the position.

A rock wall, similar to that fronting the Town Hall, will be built this year around the school property. It will start at the west corner of high school, continue east till it reaches the eastern portion of the school grounds separating the school property from that of the hospital.

A modern bicycle rack is to be constructed sufficiently large to take care of the many machines at present being used by the students. The rack will be provided with locks.

The exterior of Central school is to be painted. In addition the principal's residence and garage will also be painted.

The question of a district nurse was discussed. It was finally decided that a meeting of the Board, health committee of the council, the doctors and the union be held to thoroughly discuss the subject.

LIGHT & WATER COMMITTEE MET COLEMAN LIGHT & WATER COMPANY

Mayor Frank Aboussaff along with his Light & Water committee of W. Dutil, John Ramsay and George Jenkins motored to Calgary at the week-end where they met in conference with Coleman Light & Water company. Representing the company were L. A. Campbell, H. A. Howard and P. A. Dickieson. D. P. McDonald, town solicitor, was present, as well as Mr. J. Daddin, engineer, who has been employed by the town. Mr. Fenerty, lawyer, was also present in the interests of the company.

Conferences were held on Saturday and Sunday, but no progress is reported on negotiations. It is understood that Mr. Blackstock, of the Board of Public Utility Commissioners, may give the case a hearing this month.

Anglican Advance Appeal

REV. W. E. BROWN

The task we Anglicans have set for ourselves represents the greatest challenge of our times in the Anglican church.

We have prayed for spiritual advance, had our service of rededication and thanksgiving and now our financial objective the raising of \$4,300,000.

This will mean advance on all fronts, i.e., missionary in Canada and abroad, educational, social service, post war rehabilitation. Our church intends to do, by God's help, a vital part in laying a Christian foundation for lasting peace.

St. Alban's part financially of the \$4,300,000 is \$600. I am sure every church member will rally to the challenge and give a generous contribution. Your offering is an investment for the benefit of human souls.

The dates offerings will be taken will be announced in next weeks Journal. (Thanks to the Editor and staff).

Miss E. Molina, of Trail, is the guest of Mr. and Mrs. R. A. Montalbetti and Mr. A. Toppiano and daughters.

Advertising acts as a tonic to any head of business enterprise—

WILL ACCEPT GIFTS OF FLOWER PLANTS, BUSHES FOR MEMORIAL PARK

As everyone is aware members of the local branch of the Canadian Legion have been busy during the past three years building a Memorial Park. During that time a number of citizens have offered gifts of flower plants and bushes with which to beautify the park.

The time has now arrived when the Park committee is in a position to accept these promised gifts. Any gardener having surplus flower plants or bushes and who wishes to donate them to the Park committee are asked to notify Ray Steurbaut, steward of the Legion club, and a car will be sent to pick up the gifts.

Coleman to Sponsor Rodeo Here, Aug. 3

A local committee is busy at the present time making preparations for staging a rodeo here on Saturday, Aug. 3.

Mr. Sheline, of Pincher Creek rodeo, was in town two weeks ago and may be engaged to supervise Coleman's first annual rodeo. A letter has been sent to the provincial office of Alberta Rodeo Association seeking Saturday, Aug. 3, as the local date, but up to Wednesday afternoon that date had not been confirmed.

A great deal of work confronts the committee particularly building the corrals, chutes, etc., and requires quite a heavy outlay of money.

The cowboys, horses and cattle that perform at the Pincher Creek show will also appear at the local rodeo. From Coleman the cowboys will continue their way into BC, where they will perform and then head south into the States.

MAY 1 CELEBRATION HELD AT MICHEL

Many citizens in this area voiced their disappointment when it became known that the special train, scheduled to leave Pass Alberta points for Michel-Natal on May 1, had been cancelled. As a result it is estimated that quite a number were forced to remain at home.

Union leaders, when train and bus services were unavailable, started a move to have all available cars start from Pass towns at a scheduled time and travel as a caravan to the BC towns.

Coleman kiddies remaining at home were treated to a free show and a dime. The school classes were dismissed for the day shortly after 9 a.m.

JOE MALANCHUK NOW ASSISTANT POLICEMAN

Joe Malanchuk, town foreman, has been added to the local police force and will aid Constable Antle in providing increased police protection to the town.

Mr. Malanchuk will alternate with Constable Antle in the evenings and both men will be on duty on pay days.

Municipal Hospital Board To Expropriate Land For Site; Work To Start Very Soon

Enoch Williams Again Elected Chairman; Leading of Water System to Site Will be First Job.

Crows' Nest Pass Municipal Hospital Board met in session at Bellevue on Tuesday evening with all members present.

Enoch Williams, of Blairmore, was re-elected board chairman, and Albert Hollingshead, of Hillcrest, re-elected vice-chairman.

At the recent session of the legislature legislation was passed vesting in a municipal hospital board the power to expropriate land for hospital construction. Since the local Board has been unable to secure the site as voted upon in the plebiscite on Dec. 16, 1944, it decided to set machinery in motion whereby it can secure the site by expropriation. The description of land will be filed in the Lands Title Office, a surveyor is to be engaged to survey the site and also survey the trench in which the water main will be laid from the Blairmore water works to the site.

It was decided that a four-inch wooden pipe be purchased and the order will be placed within the next

ENOCH WILLIAMS

day or two when the amount of pipe required is estimated.

Architects Meech & Meech, of Lethbridge, are to be invited to meet with the Board, probably next week, in order that certain important matters can be attended to and to aid in speeding up the work of the architects.

Around The Town

A holiday in the middle of the week is just a day lost. It doesn't allow anyone to go far from home and those who are not garden-minded were to be seen on main street Wednesday walking around like lost sheep.

The shrill laughter and noisy chatter of over a hundred youngsters were heard at the doors of the Palace theatre on Wednesday afternoon as they gathered for a free matinee and a dime from their host, the miner's union.

The softballers are out practicing these nights. Ray Spillers is quite keen on a tall young pitcher who has just come into town. He's pretty good, says Ray, as he eyed him critically. Could be that Coleman might cop some district titles this summer.

Sport fans are beginning to ask the question "what's the delay?" in regards to the skating arena. It is almost a month since the sports' association's annual meeting was held and the committee given the go ahead signal to gather information on costs of repair to the present building and cost of a new building. So far nary a word has been heard.

Curriers are going to play at the local rink next year with sharp "stones." President Dow has sent all club rocks to Calgary to be sharpened.

The central section of second street is in for a real face lifting this summer. Council is going to

lay a concrete sidewalk past the high school to the hospital. Now comes the school board announcement that they will build a stone wall alongside the sidewalk on their property from the west corner of the High school grounds to the fence which separates the school grounds from the hospital, the two will make a decided improvement to the street.

Jim Cousins' cadets are fast improving their drill routine. They are to be seen quite frequently in the school grounds going through their paces. Jim states the girls are not as dangerous as they look.

Dick Shone has one tennis court in play and quite a number of juniors are to be seen in the afternoons trying to gain supremacy, one over the other. Now that the provincial tournaments are to again be held Dick hopes to develop one or two youngsters who will carry high the Coleman reputation gained prior to the war in provincial circles.

If Coleman is to foster sport to any degree and if there is to be an annual rodeo staged on the sports field, study will have to be given towards the construction of a proper roadway into the sports field. The present roadway is too narrow, too rough, has a blind corner and coudily, is a poor excuse for a road.

Mr. Donald Graham and Raymond Montalbetti, university students, have arrived home for the summer recess.

Mr. Roy Thompson Addressed Lions Club On Monday

Accompanied by "Seeing Eye" Dog Sylvia, In Pass Soliciting Funds For National Institute For The Blind.

On Monday evening the local Lions club were honored by a visit from Mr. Roy Thompson, in charge of the Calgary office of the National Institute for the Blind. He was accompanied by his "Seeing Eye" dog Sylvia, a 2-year-old German shepherd dog especially trained in the United States to lead blind people.

In his address Mr. Thompson stated that there are 13,000 blind persons in Canada. The reputation of the Canadian National Institute for the Blind has been built on the service given those unfortunate enough to lose their sight.

When he took over the Calgary office in 1936 there were 196 blind persons registered. Today there are 320. He attributed this not to the fact that there were more blind people to-day, but as a result of the publicity given the Institute and its good work.

The Calgary office has a territory from Lacombe to the southern border of the province. As a result in the increase of the unfortunate to be looked after expenses had increased.

Blindwork in 1936 sold for \$465. In 1945 blindwork craft brought in \$4,400.

It was now proposed to construct a Service Centre to replace the office which has served during the past 15 years in Calgary. It would possess a spacious workshop, kitchen, lounge room accommodation for 34 single blind persons, etc., and would cost an estimated \$100,000. Calgary citizens had already subscribed \$40,000 out of the Community Chest, the provincial government had subscribed \$25,000 and the balance was to be raised by public subscription and it was on the latter assignment he was engaged at the present time.

The business houses and citizens contacted in the Pass, he stated, had donated quite liberally and if he secured the same support throughout his district the \$25,000 would be forthcoming without difficulty.

In conclusion he asked the financial support of Coleman Lions' club in support of the Service Centre.

"She Wouldn't Say Yes"

Starring:
Rosalind RUSSEL and
Lee BOWMAN

The story of a girl who wouldn't say "YES" — And a man who wouldn't take "NO" for an answer.

Melrose

The Weekly Press

IN A RECENT ISSUE the Publishers' Auxiliary said: Carl Helm, editor of the Industrial Press Service paid a significant tribute to the influence of the weekly press in his article entitled "Prescription for New Yorkitis." Among other things, Helm advised big city advertising men to subscribe to their home town weeklies and read them carefully. By this means, he said, they would get the "feel of their country and their countrymen to whom they are trying to sell stuff." That advice takes on added importance when it is considered that at least half of America's retail stores are located in small towns and that the products of virtually all of the nation's big manufacturers are sold across the counters or from the floors of these establishments.

Are Countless Rural Buyers

The millions of rural purchasers who patronize the retail stores in the small towns are readers of weekly newspapers. The Auxiliary has pointed out on numerous occasions that the value of a newspaper depends not on how large a circulation it has, but on how wide an influence it exerts in the community in which it circulates. Undoubtedly the country weekly has an influence in its field that no other medium shares. That influence is based largely on readership. The country weekly is a family newspaper. The things the editor prints have a special and personal interest to every member of the family—youths and their elders as well.

Weekly Papers Widely Read

The weekly tells all about persons and happenings in the community. Readers learn what their friends and neighbors are doing—what's getting married, who has a baby, who has visitors, who's away on a trip. The paper describes farm affairs, marketings, the doings of the 4-H clubs, the activities of the local farm bureau or grange, and of women's organizations. It gives news about schools and lodges, churches and community groups. It tells what's going on in other towns in the county. And in all this weekly record of community history there are names and personalities. The editor wisely seasons his local coverage with news of national and world events, pictures, cartoons, recipes, household materials, serials and fashion articles. Thus he achieves a well-rounded bill-of-fare. All this explains why country weeklies have such a long-life readership in the family circle. It explains, too, why they are such an effective medium for reaching the rural market.

Biscuits that "Click" with the whole family

Magic's Orange-Raisin Biscuits

2 cups sifted flour 1/2 cup raisins
4 teaspoons Magic 1/2 cup butter
1/2 cup sugar 1/2 cup milk
1/2 cup salt 1/2 cup orange rind

Sift dry ingredients together. Cut in shortening until well mixed. Add raisins and orange rind. Beat egg slightly in measuring cup and add milk to make 2 1/2 cups. Add to first mixture. Roll out about 1/2-inch thick; cut with floured biscuit cutter. Place on greased pan. Bake in hot oven (475°F.) about 12 minutes. Makes 16.

Your guarantee of Successful Baking

Further Investigations

X-Ray Examinations Are Made Of Bones Of The Departed

The latest meddling with the bones of the departed great has just been reported from Upsala, where the tomb of Gustavus I has been opened, and we are told that an X-ray examination shows that he suffered from "serious disorders" which are supposed to account for various episodes in his career. Now, presumably, historians and biographers will be all for further investigations of the kind on which new theories may be built, new books issued, and new royalties gained from book and film.

We have done a little in that sort of thing over here—in the case of, Charles I, for instance, whose tomb at Windsor was sacrilegiously, as many thought, opened by Sir Henry Holford and a portion removed of the fourth cervical vertebra severed by the axe. That was in 1813. The relic was given to the Prince of Wales in 1858 and he returned it to the tomb—Manchester Guardian.

MAKE LIFE WORTH LIVING! WHY SUFFER?

Arthritis and Rheumatism. Ask your druggist for **ADAM'S GARLIC PEARLS**, or write to Richmond Adam Co., P.O. 214, Winnipeg, Can. \$3 per 100 Pearls, enough for five weeks.

To Save Bread

Ontario's Bakers Suggest Size Of Loaf Should Be Changed

The Hamilton Spectator said while the Ottawa professors chase their own tails about wheat acreage expansion and what not, a perfectly logical suggestion comes from Ontario's bakers. It is this—make the loaf smaller. At present Government regulations require that loaves be 12 and 24 ounces sizes. For many families, say the bakers—and they have a way of knowing—the former is too small and the latter too large. So much of the big loaf is frequently thrown out, while Europe cries out for bread, and bread crumbles for it.

A loaf of 16 or 20 ounces, they think would save a great deal of bread. Spread over the population, those personal chips have a way of piling up a lot of wood.

Costly Negligence

Poorly Conditioned Cars Cause Many Accidents On Highways

A considerable percentage of the accidents that occur on the highways today could be averted if all motorists took care of their automobiles. This percentage, and it is greater than many people think, marks the difference between cars that are neglected to a dangerous degree.

Regular inspection and maintenance are worth the little trouble both from an economic and from a safety standpoint.—Guelph Mercury.

The cubit, ancient measure of distance, was actually the length of a man's forearm from elbow to end of the middle finger. 2670

POST-WAR ARMY

It Will Be Provided With Modern Equipment

Col. W. G. Denney, an army ordinance director, is the president of the Commons expenditures committee that the army was basing its post-war stockpiles on the expectation of recruiting only 50 per cent of the six-division reserve force. He also spoke of the active force of 25,000 men and northwest highway and communication force of 1,200 men and declared "we are planning on a basis of supplying equipment for 80,000 troops during the initial stages of organization."

There was the supply of 113,000 cadets to be considered.

The post-war army would be provided with modern equipment. "Although," he added, "there are many new developments which may, in the near future, change the type of some weapons with which the army fights, it is somewhat too early to assess all these. Therefore, it has been decided that we will start with such battle-proven equipment as we have available, and that, as new weapons and equipment are developed, the Canadian army will share in this development."

He added: "It is planned to equip the active force to 100 per cent of entitlement of all stores, including weapons and vehicles. In fact, the present policy is that this force will be maintained at war establishment."

Discovered In Egypt

Deep Well May Have Been Home Of Sacred Crocodile

A square-shaped well which some archaeologists believe was the home of the sacred crocodile or fish in the days of the Pharaohs 3,000 or more years ago has been unearthed beside the ruins of the Temple of Tanis northeast of Cairo.

The crocodile was one of the gods of the ancient Egyptians, who even had a city and temple sacred to it near the site of present-day Fayum.

The mysterious pit was discovered by a French archaeological mission under Prof. Pierre Montet of Strasbourg University.

Egyptian peasants digging for an unexplored corner of the temple uncovered stairs leading to an underground door that opened into the well.

Limestone lined the pit, which measured nearly 20 feet across in one direction and about 17 feet in the other. Nobody knows how deep it is, but the mission hopes to find out by excavation and pumping on its return to Egypt next January.

Seems Difficult

For Nations To Acquire Taste For Fruits Of Peace

The Winnipeg Tribune says: An odd little story comes from London about some of the youngsters who for the first time in their lives are being given bananas. It seems that a few of the little nippers who have never seen the fruit before are highly suspicious. They gladly exchange their bananas for an extra spoonful of cod-liver oil which they consider a special treat. The nations seem to be having somewhat similar difficulties in acquiring a taste for the fruits of peace.

Answer To Last Week's Puzzle

LEADS WOMEN VETERANS

National commander of the Legion of Women Veterans, a new all-women's veterans group believed to be the first of its kind in the U.S., is Mrs. Patricia M. Deuse. An ex-marine, Mrs. Deuse has her office in New York. She is a former newspaperwoman.

Has Become Problem

Top Soil On Canadian Wheat Lands Must Be Conserved

It used to be said that if you tilled Canadian soil it laughed at you. That was when our top soil was virgin land. Those days are passing and we must conserve that top soil and use our research facilities as well as fertilizers to maintain our position, if we mean, of holding the broad basket of the world. Of course, farmers did "mine" wheat for years rather than plow deep as they need to do in older lands. The problem of depleted top soil is worse in the United States and the revival of its growing possibilities is their problem today. Some varying experts say fifty per cent of the United States top soil is worn out. So that another immigrant may try to save America for Americans. Australia sent the U.S. a sort of clover which is termed a subsoil clover which has been tested on the worst hillside in Oregon and has made it good dairyland producing prize sheep and wool.

It is of interest to farmers hereabouts that this Australian clover is a dense-growing, self-seeding pasture, hay and seed crop; all kinds of livestock and poultry like it, and it does well in red soils that are very acid and low in phosphorus. But it does seem to like mild winters, the south and the Pacific coast will probably benefit most from it. In addition to all its virtues it seems to be an excellent weedkiller as well, especially when seeded together with grass it just smother them.—Brandon Sun.

Approximately 4,000,000 acres of grassland were plowed up in England in two years.

HOW TO SAVE BREAD

Easy Method Suggested Has Worked Out Beneficially

Miss M. B. Ross, Niagara Falls, writes: To save bread use one or two good cookie cans with lids, no air holes, a large loaf of bread can then be sliced in its entirety (pre-war style), pack slices in said cans, and it will keep fresh until all eaten, and to mention the handiness in doing away with butcher knife and loaf every time one feels hungry. In a family of two, where only three slices of toast are eaten daily at breakfast, this system has worked out beneficially for the past six years and more. Any bread that does get tangled in the wayside can be tossed into a nice clean paper bag (it will not mould in this), and when a quantity has accumulated, put it through the grinder for bread crumbs, to be handy when cooking. Palatable dishes, such as baked or fried tomatoes, with curry sauce, fried egg plant, and other delectable meat or vegetable dishes, can be sprinkled with crumbs taken from the staff of life. And what about our old-fashioned, but up-to-date way of making bread pudding? Bread fried in whipped egg is not to be sneezed at. Whether the bakers will relish the idea of two types of loaves to handle I don't know, but at least the intelligent can prevent such wanton waste of bread, especially when radio and papers are daily appealing to us to help Save-the-Bread and widening into Save-the-Grain campaign."

Far Ahead Of Plan

Tokyo Being Rapidly Reconstructed But Not As Modern City

Unlike Europe's ruins, the huge war-created wastelands of Japan did not green over with new growth. So fierce had been the heat from fires that every deep root and every seed of the hardest plants had been destroyed. Instead, raw new wooden logs sprang up in clumps on fire-born deserts. Along every inlet of the Sumida River and the city's countless canals, sawmills devoured logs floated down from the country. So fast is the capital's reconstruction going on that it is now safe to predict the builders will far outstrip the planning boards. By the time the government puts forth ideas for a modern city the same old wood and paper rabbit warren that always was Tokyo will be starting it in the face.—Newswave.

Paintings Returned

Twenty-Six Taken By Germans Are Back In Netherlands

Twenty-six famous Dutch paintings which were stolen by the Germans during the occupation, and which were found by Dr. A. P. A. Vorenkamp, for many years director of art at Smith College, Poughkeepsie, N.Y., have been taken back to the Netherlands aboard an American airplane.

The paintings, among which were works by Rembrandt, Peter Paul Rubens and Vincent van Gogh, were found at Berchtesgaden, site of Hitler's "Eagle Nest," and at Linz, Austria.—News, Toronto.

GIFT FROM MAHARAJAH

A gift of 50,000 rupees (approximately \$16,250) for relief of distress in Britain has been received from the Maharajah of Nepal, who wishes, on retiring from public life, to commemorate the happy relations which have existed between the peoples of Britain and Nepal during his long tenure of office.

Magical Secrets

Conjurors Complain That There Has Been A Serious Leakage

Veteran magicians complained today that the modern generation of conjurers not only sways a woman in half—but goes around boasting about it. As a result there has been a "serious leakage" of magical secrets dating back centuries and a worldwide campaign to protect the remaining mysteries of the craft is underway.

In England, two bodies are deeply concerned with the leakage. W. G. Strickland of the International Brotherhood of Magicians blames it on the war. At the brotherhood's annual dinner, Strickland offered a cigar—naturally it disappeared before I could grab it—and lamented the here's-how-it's done trend.

GEMS OF THOUGHT

"ABUNDANT LIFE"

The "abundant life" which Jesus desired to bring is to be had by the sincere application of his gospel to life.—Rev. Benjamin L. DuVal.

In this world, it is not what we take up, but what we give up; that makes us rich.—H. W. Beecher.

Paul said John had a clear apprehension that, as mortal man achieves no worldly honors except by sacrifice, so he must gain heavenly riches by forsaking all worldliness.—Mary Baker Eddy.

It is not the fact that a man has riches which keeps him from the kingdom of heaven, but the fact that riches have him.—Caird.

I know indeed that wealth is good; But lowly roof and simple food, With love that hath no doubt, Are more than gold without.—J. G. Whittier

The good man has absolute good, which like fire, consumes everything to its own nature, so that you cannot do him any harm.—Emerson.

Spice Twists
1/2 cup sifted flour
1 teaspoon baking powder
1/2 teaspoon salt
2 tablespoons sugar
1 egg white
1 tablespoon water
1/2 teaspoon cinnamon
1/2 teaspoon shortening
1 egg yolk, slightly beaten
1/2 cup milk
1/2 cup sugar
1 teaspoon cinnamon

Sift together flour, baking powder, salt, sugar and cinnamon. Cut in shortening until mixture resembles cornmeal. Combine egg yolk, milk and bran; add to first mixture, stirring only until flour disappears. Turn out onto lightly floured board; knead about 18 strokes. Roll out to rectangle about 7 x 14 inches. Brush dough with egg white and water beaten together; sprinkle with mixture of sugar and cinnamon. Cut dough in 15 strips, about 3/4 inch wide; fold end to end and twist strips. Brush top with egg white and water mixture and sprinkle with sugar and cinnamon. Bake on greased baking sheet in moderately hot oven (425 deg. F.) about 15 minutes. Yield: 15 3 1/4-inch twists.

NOW UNDER RESTORED BRITISH RULE, HONG KONG HAS ALL THE ASPECTS OF PROSPERITY

HONG KONG.—Hong Kong "came back" after politico-labor troubles of 1925 and the effects of the world depression in the '30s. Now, under restored British rule, it again is displaying its great resiliency. It claims, with justification, it leads all other reoccupied British and Chinese territories in rehabilitation.

All things are not yet back to normal in this British crown colony off the coast of China where Canadian troops fought and died at the opening of the Pacific war. Housing is extremely short. World-wide post-war unrest with its resulting crime wave has been felt here, too. A free flow of trade has yet to be restored. The naked population of whites and orientals lacks unity.

But eight months after restoration of British rule Hong Kong has all the outward aspects of prosperity that prevailed when the Royal Rifles of Canada and the Winnipeg Grenadiers landed here in 1945 to bolster defence forces being built up as the dark cloud of war loomed on the Pacific horizon. The goal of normality is all but attained.

The 1,594 Canadians who surrendered to overpowering Japanese strength on that black Christmas day of 1941—the remnants of a force of 1,885 Dominion troops—would find, should they return here, great changes in the colony's social order. No longer is the soldier looked at askance by the colony's socially conscious ruling class, white and orientals. No longer is he barred from leading restaurants, hotels and cabarets.

But one urgent need of Hong Kong is unity among its mixed population. On the credit side of Hong Kong's rehabilitation ledger are these concrete achievements:

Utility services have been restored to the pre-war basis and communications are well on the road back. Electricity and gas are available at all hours. Supplies for civilian consumption are beginning to appear on the market. Materials for reconstruction of bombed-out and booted buildings are being brought in. Food supplies are ample and no one needs fear hunger.

Owing to the mixed and "transient" population, general rationing is not enforced. Government-controlled commodities such as rice, the staple food, sugar and butter are rationed but unlimited food can be ordered at restaurants, both Chinese and occidental. A black market in rationed food prevails but this is gradually being cleaned up.

Communications with the outside world have been restored.

The only phase of rehabilitation which is behind schedule is that of education. The Japanese almost succeeded in stamping out western culture.

Sees A Great Future For The Northwest

WINNIPEG.—Every detail of humanity, statesmanship and common sense called for lifting of Canadian production to its maximum "early and rapidly." Resources Minister J. A. Glen told the Manitoba branch of the Canadian Manufacturers' Association.

"Money gifts and loans," he said, "become mere futile gestures unless we produce goods to be bought with the money." A large part of the turmoil and distress existing today in the world was due to the scarcity of goods needed both in everyday life and for reconstruction.

The federal minister saw a great future for Canada's north country. Its development, he said, would be felt throughout the entire Canadian economic structure. Discovery of new sources of mineral wealth invariably was followed by a demand for both basic and secondary products.

"A great market is being opened up for the products of industry at your very threshold and preliminary surveys indicate that it will continue to expand as discoveries extend the field of activity farther into the Canadian shield."

He said there now were more than 15,000 claims in good standing in the Yellowknife district; more than 200 mining companies had been incorporated for operations in the Northwest Territories and about 70 companies had exploration programs in various stages of development.

In the comparatively short time the Yellowknife field had been in operation, gold valued at about \$14,500,000 had been recovered.

LONDON.—German prisoners-of-war will build camps in London parks to house 18,000 British and dominion servicemen who will march in the June 8 victory parade.

TERMS EXTENDED

Reinstatement Act Protects Pre-War Jobs For Veterans

OTTAWA.—Members of the armed forces who come under the provisions of the Reinstatement act are entitled to pre-war job protection if they are discharged prior to April 30, Labor Minister Mitchell said in a statement.

Although the Reinstatement act, which gives members of the forces the right to return to their pre-war jobs, was a purely war measure its terms were extended to provide protection of the civilian employment rights of members of the interim force whose service was retained during the reorganization period.

Claim for reinstatement in the civilian job must be made within three months if the veteran is discharged in Canada, or within four months if he is discharged overseas. Extension may be allowed if health of the veteran interferes with his return to civilian employment.

BELOW ESTIMATE

Australia Is Likely To Be Short On Wheat Exports

CANBERRA.—Australian exports of wheat in the next few months are likely to be millions of bushels below the 37,000,000 bushels the famine emergency committee proposed that the commonwealth export before the end of August, official sources said.

The informants said that according to present indications Australia would be able to ship at least 20,000,000 bushels between now and Aug. 31 but would not be able to reach the 37,000,000-bushel mark.

BUILDING PERMITS

Winnipeg Safety Committee Makes Drastic Recommendations

WINNIPEG.—In a drastic move to release building materials for home construction the Winnipeg safety committee has placed before council a recommendation that all permits other than those for housing be revoked May 1.

Building permits would be issued only for single dwellings up to a maximum cost of \$10,000; commercial buildings with dwelling attached; apartment blocks for residential purposes only, and buildings for the benefit of the public generally.

PAYING WAR DEBT

AUCKLAND, N.Z.—New Zealand has arranged to repay to Britain the equivalent of \$64,800,000, the amount of the last outstanding overseas loan raised to finance her part in the Second Great War. The balance of money borrowed abroad previously had been repaid.

KING GEORGE DONS CIVVIES.—In civvies for the first time in six years, King George wore a check suit, tweed overcoat and derby hat at the St. Mary's hospital rugby cup final at Richmond, Surrey, Eng.

RETURNING HOME

Royal Air Force Personnel Of Northwest Air Command Finish Work

EDMONTON.—Royal Air Force personnel, attached during much of the winter to the winter experimental flight operated at northwest air command's Edmonton station, are beginning to leave the unit for the summer, it was learned. It was believed some were returning to Britain.

With winter weather rapidly ending even in the far north, the work of the unit in flight testing military aircraft under cold conditions was nearing an end for this season, it was reported.

The unit is operated jointly by the R.C.A.F. and R.A.F. and during last winter tested a number of British military aircraft over Edmonton and further north.

ASKING FOR HELP

Manitoba Wants German Prisoners Of War For Farm Work

WINNIPEG.—Manitoba has asked the federal department of labor for 1,600-1,800 German prisoners of war to work in its sugar beet and grain fields this year, it was learned. About 1,000 were employed last year.

The department has tentatively agreed to send 700 with an additional number if it can be arranged but all agreements are conditional upon the attitude of the British government. Provincial agriculture department officials say that while the total need for farm labor cannot be determined as yet, there was a distinct shortage of skilled help in the livestock and dairying fields.

PLENTY OF BREAD

Officials Believe There Will Be No Shortage In Canada

OTTAWA.—Government officials said they believed no bread shortage will result in Canada from recent steps to increase grain shipments to starving countries.

Commenting on a report from Chicago that a shortage of bread may be felt increasingly in the next few weeks, authorities pointed out that the one-fourth cut in United States domestic flour production was hardly comparable to the Canadian reduction of 10 per cent. from 1945 supplies allowed for domestic milling. It was recalled that at the time the reduction was announced in Canada last March 17, Prime Minister Mackenzie King stated that no shortages were expected to result.

MAY BE RECORD

United States Is Looking For Large Crop This Year

WASHINGTON.—N. E. Dodd, under-secretary of agriculture, said there is a "good chance" that this year's wheat and corn crops will be the largest in United States history. It was recalled that his optimistic prediction on reports he has received in recent weeks from all parts of the country.

He said the early spring season had enabled farmers to get a fine start on planting operations.

Mr. Dodd, himself a farmer, told an interviewer he felt confident farmers will plant nearly 300,000,000 acres of food, livestock feed and fibre crops nearly 4,000,000 more than planted last year.

LABOR DEPARTMENT REPORTS IMPROVEMENT SHOWN IN THE UNEMPLOYMENT SITUATION

ROUNDOABOUT ROUTE

Necessary For Canoe Trip From Vancouver To New York

QUEENSLAND, B.C.—Fisherman and prospector, 66-year-old O. P. Smith, may be heading for New York in a trans-continental canoe trip from Vancouver but he is farther from his destination than when he started. Since leaving the coast over two weeks ago he has travelled in a general northerly direction.

The roundabout route is necessary since the hardy traveller must follow a series of waterways in order to eventually reach the Saskatchewan river which will take him across the prairies.

Next stop along the Fraser river is Prince George. Mr. Smith has had no trouble so far, he said, but expects some difficulty in negotiating the Cottonwood and Fort George canyons.

At Prince George he will ship his canoe 32 miles north to Summit lake, and from there he will continue northward until reaching Finlay Forks where he will head eastward through the Peace pass and go down the Peace river.

REDUCTION ASKED

New Zealanders Willing To Do With Less Food

AUCKLAND, N.Z.—Widespread demand for stricter rationing to make more food available for Britain has developed in New Zealand with many persons contending the government's introduction of a campaign for increased food conservation is insufficient.

New Zealanders are rationed in meat, butter, sugar and tea and restrictions exist on consumption of other foodstuffs. But the rationers are large compared to those of Europe and from many quarters have come demands that rations be reduced to compel all to economize.

The government already has urged the saving of food coupons to release extra quantities for Britain. The campaign also has advocated prevention of waste, an increase in the dispatch of private food parcels and increased production.

READY FOR USE

Purified Vaccine Developed For Sleeping Sickness In Human Beings

SASKATOON.—A purified vaccine for encephalomyelitis (sleeping sickness) in human beings is ready for distribution from the University of Saskatchewan if any outbreak of the disease develops.

The animal disease laboratory under Dr. J. S. Fulton, professor of veterinary hygiene, has developed a method of removing proteins, which affect some persons unfavorably, from the horse vaccine.

OTTAWA.—The margin between unemployed workers and "filled jobs" has started to narrow reflecting an improvement in the employment situation, the labor department reported on national employment office records at April 1 the department said "the peak of unemployment, associated with reconversion, has been reached and passed."

The number of unemployed applicants registered at offices across Canada at April 4 was 267,000—3,600 more than at Feb. 28, but the smallest monthly increase since V-day. However, the number of available unfilled jobs at 87,000 represented an increase of 12,900.

In view of the fact that over 72,000 servicemen were discharged during March, it is apparent that there was actually a substantial increase in the number of jobs appearing on the labor market in the recent months," the department said.

"Since April 4 this expansion has exceeded the flow of workers into the labor force and unemployment has consequently declined."

The rise in unemployment during March again was confined almost entirely to male workers. Male unemployed applicants totaled 219,000 while there were 48,000 unemployed women workers compared with 215,000 and 48,000 respectively.

Unfilled vacancies for males, numbering 44,000 at Feb. 28, rose to 50,000 April 4. Female vacancies also rose substantially, from 32,000 to 36,000, during the same period.

Has New Plan To Deal With World Problems

WASHINGTON.—A new plan to tackle Europe's terrific economic problems on a continent-wide basis, by setting up a United Nations regional office at Geneva, has been taken to Paris by James Byrnes, United States Secretary of state. He may present it to the foreign ministers in a move to break the big power deadlock over the peace treaties.

This was learned from persons familiar with all details of the proposal. They said that some of Mr. Byrnes' top advisers in the state department split over the plan and that Mr. Byrnes himself has not committed himself to it. But he has indicated keen interest in it as a possible solution to the stalemate confronting him at Paris.

He received a first draft of the new proposal shortly before he left Washington. He had discussed it on several occasions with advisers who favor it, particularly Dean Acheson, undersecretary of state.

The new plan calls for a European sub-office of the United Nations beginning with a group representing the economic and social council which would be known as the European economic council. Under this would be organized agencies to handle fuel and power, trade and industry, transportation and food. These four would absorb the present European coal organization, the emergency economic administration for Europe, the European central inland transport organization and whatever food machinery now exists. Geneva was suggested as the site because housing is available there at the headquarters of the old League of Nations.

HELPS INSTRUCTOR

New Dual Controlled Car Designed By R.C.A.F. Officer

VANCOUVER.—Back seat drivers in Vancouver have at last come into their own—if only they will step into the front seat.

An automobile fitted with dual controls along the same lines as an airplane has been designed by W. A. McKinley, a flying officer in the R.C.A.F. He intends to use it in teaching beginners to drive.

The newly-designed vehicle will give the instructor instant control in case of emergency.

REDUCING FLEET

SHANGHAI.—Admiral Sir Bruce Fraser told a press conference he soon would be relieved as commander-in-chief of the British Pacific fleet in line with a reduction of naval strength to pre-war standards. Sir Bruce said his fleet, now at peak strength, soon would be cut one-third.

BUILDING AIRLINER

TORONTO.—Britain's newest and largest airliner, the Tudor II, is to be built in Canada at the Malton plant near here which produced many Lancaster and Lincoln bombers during the war.

NOTES AND COMMENTS

SECOND USED CLOTHING DRIVE

From June 17 to June 29 Canada will launch on its second used clothing drive to aid the suffering millions in Europe who lack both food and clothing.

Last October Coleman got behind this drive and secured a considerable amount of clothing. Up to the present nothing has been heard locally regarding the organization of a committee to handle the drive next month. All communities, coast-to-coast, will be organizing shortly and it is expected that some wide-awake body will start organizing here. It will take a week or so to form the committee, zone the town, secure ladies to sort the clothing as it comes to the depot, secure a suitable depot and make arrangements for the loan of trucks to gather the clothing and then take the packed crates to the depot.

Coleman should start organizing now.

MONEY IN THE BANK

It would be interesting to know the amount of money that is lying idle in our chartered banks, put there by organizations in the various communities and become more or less forgotten, as the organization dies or trustees move away to other communities or pass away to their last resting places.

Here in Coleman we know of at least three accounts that are lying dormant at the present time.

Remember our Ambulance Fund? We understand that \$1,000 is still on deposit at the local bank. It is understood that some of the committee still residing in town plan on discussing its disposal within the next few days.

Remember the Citizens' Sports Committee that had the late Bill

Bell as its chairman? It also had the late Howard McBurney as a trustee as well as John D'Appolonia and Wm. Chapman now no longer residents of Coleman. Only two trustees reside here and the Fund is thought to have about \$16 remaining.

Then there is the Salvage Fund. It still has a few dollars lying idle and which will have to be disposed of before many more months have passed.

Recently we were approached by the secretary of the Crows' Nest Pass Football Association. It appears that a \$9 deposit is in the Fernie bank and has been there since 1939. We are still considered a trustee of that money.

Possibly there are other deposits which lie undisturbed in the Coleman bank, registered in the name of an organization which has been disbanded and is now forgotten.

If trustees of these various funds would get this money and donate it to the Red Cross or some community activity it would be to the advantage of the community as a whole. After all who donated this money, was it not the citizens of the community?

KEEP 'EM CLEAN

It has been a long winter and as a result back yards and alleys in town have been allowed to accumulate quite a lot of rubbish.

The latest report of the Medical Health Officer revealed that the sanitary condition of the town is not satisfactory. Citizens generally can remedy this situation quite easily by cleaning up their premises and their own section of the back alleys immediately. Now that the mild evenings are once again being experienced one can derive much

pleasure in wielding a rake and burning the trash. Let's keep our town clean.

CAUGHT NAPPING

It would appear at this date that the municipal councils and service clubs of the Pass have been lulled into a false sense of security in regards to improvement of number three highway though this area as the result of promises made last fall and winter. Many road contracts have been awarded by the Highways Department in various parts of the province but not once has a public announcement in the past two or three months ever mentioned the Pincher Creek-Crows Nest highway, which is a very important link in the Southern Trans-Canada highway as it possesses the most prolific coal mining area in Canada as well as possessing scenery of unsurpassed grandeur.

If this Pass area is to receive its rightful recognition as the fourth most populated area in the province, if we are to extend a welcoming hand to the Canadian and American tourist, and if we are to share in the much publicized tourist dollar we must arouse ourselves from our present lethargy and get busy with meetings, resolutions and petitions in an effort to turn Edmonton's eye in this direction and inform in bold manner the terrible conditions of this road.

FABRICATED HOUSES NOW AVAILABLE LOCALLY

Want a new home in jig time? If so your attention is directed to Excel Builders advertisement which deals with the new and modern fabricated home.

Homes are of various sizes and design and can be delivered to your lot in two weeks time. The material is of high grade coast (BC) dry fir and is ready cut. For all detail pertaining to these new homes it is only necessary to contact Mr. Joe D'Appolonia who has pamphlets and other literature available.

EXPECT BOWLING GREENS TO BE READY FOR PLAY IN JUNE

Executive of the local branch of the Canadian Legion expect to have their three bowling greens ready for play in either June or July.

The greens were sown with a special grass seed last spring and considerable attention has been given them during the past year with the result that they are in pretty good shape at the present time.

Some members of the executive are now busy trying to get bowls with which to play and the Calgary Lawn Bowling Association is being contacted in an effort to secure bowls.

SLUGG AND RYPIEN HOME

Jimmy Slugg and John Rypien, have arrived home from the hockey wars.

Jimmy played for Kimberley Dynamiters during the past season, his team failing to get far in the play-downs, being nosed out by Nelson, who in turn were defeated by Trail.

Johnny has enjoyed an exceptionally good year with Edmonton Canadians, the team that lost out in

the western final to Winnipeg Monarchs, who in turn went on to win the Memorial cup, emblematic of the Dominion junior championship. Both young men plan on trying out with Montreal Canadians next fall.

LEGION TO SPONSOR MAY 21 DANCE AS ANNUAL AFFAIR

Coleman branch of the Canadian Legion is sponsoring a May 24 dance in the Community hall with Ed's orchestra in attendance. Dance starts at 9 p.m.

Proceeds will be placed in the

Legion annual picnic fund. The first picnic was held at the Sports' field in 1944. Last year due to difficulty in securing pop, fruit and certain foodstuffs it was decided to cancel it for that particular year. This year it will be held in mid-summer.

"Meet my neighbour... my rainy-day expert"

"Pretty swanky, eh?" said Henry's neighbour, eyeing the new sunroom. "How come? Did you win some money at the races?"

"Meet my neighbour... my rainy-day expert," said Henry. "As my life insurance man, he helped me finance this new sunroom fifteen years ago."

"Fifteen years ago!" exclaimed the builder, glancing from one to the other.

"Years ago he gave me a new slant on life insurance—Provide for the rainy days... then you can enjoy the sunshine." So that's the way I budget. My life insurance premiums are the first call on my income. That means I don't have to worry about Kitty and the kids. Then I figure current expenses, right down to so much a week for movies and ice cream cones. And then... whatever I can bank over and above that is velvet. When it mounts up, Kitty gets a new gadget for the kitchen, or we smarten up the house. This new sunroom comes out of our velvet."

There is nothing like life insurance to give a man peace of mind. He can enjoy spending if he is sure that the future of his loved ones is secure. Everyone wants independence and protection for his family... and when that is insured, a man can indulge his whims.

Near you, wherever you are, is a neighbour in the life insurance business. Ask him for advice in planning your future. It is good citizenship to own life insurance.

A message from the Life Insurance Companies in Canada and their agents.

L1568

A Call to Action

addressed to All Members of the Church of England in Canada by THE MOST REVEREND DERWYN T. OWEN, D.D., D.C.L.

Primate of all Canada

NEVER has humanity been in greater need of the Christian Gospel, the inspiration and guidance of Christian teaching and the Christian spirit.

Today we give thanks for a physical victory over forces opposed to every Christian principle. But these forces must still be fought in human minds and hearts. The only new order worth building is a Christian order. At home and abroad, the Christian Church faces a renewed challenge.

That is why the Church of England in Canada is making an appeal to her people for redemption, self-sacrifice and constructive action.

This movement seeks to make Anglicans more truly Christian; to make them conscious of the historic mission of their church; to strengthen the spiritual, educational and social work of the Church at home and abroad; and to provide funds for additional Clergy; for the pension fund, for helping the Mother Church in England and the Churches in Europe in their work of rehabilitation, for providing youth training and leadership, and for assisting all Dioceses in meeting their local needs.

The Appeal was launched in our Churches on the Feast of the Epiphany, Sunday, January 6th, and will continue till May 19th. In its spiritual aspects it has already reached the homes of our people and its programme will continue over years to come. During the week of May 12th to 19th, every member of the Church of England in Canada, so far as possible, will be visited by a fellow member, authorized to receive contributions to the \$4,900,000 fund needed to carry out the financial program.

I bespeak from every one of our members and friends the earnest, prayerful consideration of this urgent need. I am confident that if every individual does his and her part, the combined objective of spiritual enrichment and financial support will be fully achieved.

CAR OUTPUT JUMPS

Return of Chevrolet and Pontiac cars to dealers' showrooms across Canada has put the automobile business in its briskest sales position since distribution became general last January. The Financial Post is informed.

The news on the production front coincided with Packard Motor Car of Canada's announcement that it would build a factory at Windsor "in the not too far future."

General Motors, Chrysler and Ford are all marketing low and medium priced models at present, although dealers generally are keeping their fingers crossed against another interruption in supply. Studebaker, too, up for its 1947 model due early next month, has stopped making deliveries for the time being and Hudson is reported to be virtually closed up due to supply shortages resulting from earlier strikes. Nash dealers report they are getting delivery of limited numbers of cars and Packard reports "a steady trickle" at present, with every indication that the first week in May will bring a substantial volume of deliveries.

THEATRE NOTES

ROSALIND, LEE TO CO-STAR
IN NEW COMEDY

Rosalind Russell recognized in screen circles as the ace portrayer of career women, is about to give another one of her vastly amusing and inimitable performances. This time it is a brilliant and, of course,

lovely-looking and smartly-attired psychiatrist in Columbia Pictures' new comedy, "She Wouldn't Say Yes," in which Lee Bowman will appear as her co-star at the Palace theatre beginning on Saturday.

Said to be one of her most hilarious rolls to date, the racy, embrace story of "She Wouldn't Say Yes," tells of her attempt to cure a certain Spanish dancer, Allura (Adele Jergens, the Eyeful), of a complex about kissing men and in the process having to take a severe cure herself, Lee Bowman, plus his cartoon creation of the Nixie, an impish little fellow who quickly dissolves a persons' inhibitions by his sarcastic remarks and changes wild dreams into wondrous reality, are the curers. Preview audiences report that it's all very gay and light and relaxing.

T.B. QUESTIONS
ANSWERED BY THE
ALBERTA TUBERCULOSIS
ASSOCIATION
EDITED BY F. W. HESS, M.D.
National Tuberculosis Assn.

Q. I have been told that under certain conditions fever indicates that the body is fighting infection and so it may be regarded as a hopeful sign. Is this true?

A. One of the goals in the treatment of tuberculosis is to become free from fever. Nevertheless many of the reactions of the body to resist disease are accompanied by fever. While it does mean the body is fighting, one likes to see the fight won and the fever disappear.

Every Wife should answer these questions:

Without you, could your husband provide the RIGHT care for the children? Probably not without extra money to make some suitable arrangement . . . which is good reason why you, as his partner in the business of running the home, should carry insurance on your own life. In any partnership, protection against sudden emergencies is important . . .

Does it matter WHICH life insurance company you choose?

It does matter! Life insurance companies are much alike as to policies and rates, but actual long-term results vary widely. We invite you to compare The

Mutual Life of Canada's record with that of any other company. Evidence of the satisfaction of Mutual Life policyholders is furnished by the fact that whole families and succeeding generations have entrusted their life insurance programs exclusively to The Mutual Life, and each year approximately 35% of its new business comes from policyholders. Ask your Mutual Life representative to explain the special features of this Company.

Fishing In The National Parks

The lakes and streams in Canada's national parks are among their chief scenic attractions. To the angler these waters provide a special interest—game fish. Many visitors come to the parks mainly because of the prospect of good sport fishing; others combine fishing with some of many forms of recreation and relaxation which have made the parks such popular national playgrounds.

Some of the parks offer a greater variety of game fish than others. The waters of Banff and Jasper National Parks, in Alberta, contain several species of game trout—rainbow, cutthroat, eastern brook, lake, Dolly Varden and brown trout. Waterton Lakes National Park, also in Alberta, has five species of trout, not including the brown trout. Cutthroat are common in the four national parks in British Columbia—Kootenay, Yoho, Mount Revelstoke and Glacier. Rainbow, lake trout and Dolly Varden are common in the waters of Yoho, while Kootenay Park offers rainbow and Dolly Varden. Dolly Varden is the most common species in Glacier Park, and rainbow in Mount Revelstoke. Jasper and Waterton Lakes provide angling for pike, and all the mountain parks have waters inhabited by the Rocky Mountain whitefish.

In the so called "Prairie" Parks—Prince Albert in Saskatchewan and Riding Mountain in Manitoba—pike provide one of the chief sources of sport fishing. Specimens over 15 pounds in weight have been taken from these waters. Prince Albert National Park also provides angling for large lake trout, pickerel, and an introduced species, the small-mouth black bass. Lake trout reach a weight of 35 pounds in the larger lakes. Adult lake trout are being introduced into Clear Lake in Riding Mountain National Park and appear to be adapting themselves to their new home.

Among the game fishes in Eastern Canada are the small-mouth black bass and the giant muskellunge. Georgian Bay Islands and St. Lawrence Islands National Parks in Ontario provide fishing for these species. Point Pelee National Park, also in Ontario, offers fishing for pickerel in its ponds, and for pickerel and small-mouth black bass in the adjacent waters of Lake Erie.

In the Maritime national parks, Cape Breton Highlands in Nova Scotia makes a unique contribution to Canadian sport fishing with its Atlantic salmon, eastern brook trout, and in the offshore waters swordfish. Several of the small lakes and ponds in Prince Edward Island National Park contain brook trout, and deep-sea fishing is available in coastal waters.

The National Parks Administration maintains fish hatcheries for stocking these parks. Many of the lakes now producing the best fishing were originally barren. Recently a highly qualified limnologist was added to the staff of the National Parks Bureau in Ottawa, whose task it is to investigate problems connected with fisheries management in the national parks and to insure scientific conduct of all related activities. With careful research and intelligent management the waters of Canada's national parks should continue to provide an increasing measure of abundant game fish and good sport fishing.

T. B. Questions and Answers

Q. Is it normal for the temperature to be higher in the afternoon or evening than it is in the morning? Is it a sign of T. B?

A. This is normal, and also, with few exceptions, all infectious diseases are accompanied by a rise in

the afternoon and evening. The fever is the result of the poisons absorbed.

Q. What is the average variation in temperature in a TB patient?

A. No average can be determined. Variation may be within one-half of a degree to several degrees, depending on the character of the disease and whether or not it is progressive.

Availability of Executive And Professional Personnel

Nearly a year ago, the National Employment Service added to the service a new division known as Executive and Professional Personnel Offices. These offices were established at Moncton, Montreal, Toronto, Winnipeg and Vancouver for the purpose of placing in employment men and women possessing executive and professional abilities.

A review of the past year's operations of these offices indicates that demand for executive and professional persons is heavy, and that a fair number of this type of applicants has become more readily available due to the return of armed forces personnel and release from war industry.

At the end of March, 1946, there were 1,020 openings registered in the Executive and Professional Offices and 1,758 applicants listed as available. The continuing demand for executive and professional persons is due principally to the development and progress being undertaken throughout the reconstruction period. A section of the Executive and Professional Offices deals with the problems of ex-serv-

ice personnel. Although many persons with executive and professional ability seeking employment after being demobilized from the armed forces have limited experience in

civil employment, it is gratifying to note that employers are readily accepting these men and women for executive and technical positions. Since the opening of these offices

less than one year ago 6,000 persons have been referred to employment and 4,480 have been placed in permanent employment at annual salaries above \$2400.

OUR VALUABLE FORESTS . . .

In Alberta we have a great heritage in our forests and streams. If our forests are blackened and ruined by fire instead of forest industries supplying the building material we require and providing a living directly and indirectly for thousands of people, instead of our shady playgrounds, big game, fur bearing animals and our pleasant streams, what are we going to have? A ruined industry, roaring torrents in the spring and dry water courses in the

summer, soil erosion and all the other ills that occur in any country where the balance of nature is upset by the destruction of a great part of the forest.

Your local ranger contends that a lot of good citizens live in his district. He takes this opportunity to thank you for the co-operation you gave him last year and he is sure the more you realize the situation, the more he can count on your co-operation and assistance.

1946 is an all-important year FOR CANADA'S TOURIST BUSINESS

MILLIONS OF AMERICAN VISITORS are expected to come to Canada during 1946 for their post-war vacation.

It won't always be easy to accommodate them. We still have our crowding and shortages. We are still in the aftermath of war. This is the very reason we should all take special care to be courteous and considerate to our guests this summer.

This year, of all years, we must maintain the reputation we have won for true hospitality.

YOU MAY NEVER SEE A TOURIST, BUT... tourist dollars flow to you. The grocer, the garage man, the farmer, the office worker—everybody benefits directly or indirectly from tourist spending, and the extra work and income it creates. Last year, tourists in Canada spent more than one hundred and fifty million dollars. In the

years ahead, as our ability to handle tourist traffic grows, who is to say how big this business may become? For Canada is in an enviable position—a natural vacation land next door to the most travel-minded nation in the world. This is an all-important year! It may be difficult in many ways yet it holds great promise for the future.

THEY'LL BE TALKING ABOUT US... We want them to come again. We want them to tell their friends: "We had a marvellous time in Canada!" By making them truly welcome, we can win millions of enthusiastic salesmen for Canada—"satisfied customers" who will pass on to many times their number the story of Canadian hospitality and of Canada's unlimited attractions as a vacation land.

SEEKS CLOTHING—Redverse F. Pratt, executive director of the National Clothing Collection for overseas relief, to be held June 17-20 under the auspices of Canadian Allied Relief. Mr. Pratt, who took an active part in the 1945 clothing drive, is on loan from the Dominion Department of Labor and is busy now organizing committees throughout Canada for this nationwide effort to aid the distressed peoples of war-devastated Europe.

ST. PAUL'S UNITED CHURCH
Sunday May 5:
11 a.m., Morning worship. Rev. Irwin guest speaker.
12:15 noon, regular session of the Sunday school.

Altar flowers on Sunday, April 28, given by the Ketyls family in memory of Rev. George Ketyls—our former pastor.

The Ladies Aid will meet on Thursday, May 2, at the home of Mrs. Mary Fraser.

ST. ALBAN'S CHURCH
Rev. W. E. Brown, Rector
Daily offices:
Mornings 9 a.m. Evensong 7:30 p.m.
Friday: Choir practise 3 p.m.
The second Sunday after Easter:
Holy communion 8 a.m.
Young people's service 2 p.m.
Holy baptism (by app't) 3 p.m.
Evensong 7 p.m.

At this service the Rector will outline our parish's part in the Anglican Advance Appeal.

Altar flowers Easter day given by Mr. and Mrs. W. L. Borrow; Mrs. E. E. Kennedy in loving memory of her father, E. W. Beart; Mrs. J. C. Richards in loving memory of her husband and Dulcie; from the Rectory in loving memory of Clayton Brown.

CHURCH NOTES
During the evening service the Rector paid a fitting tribute to the work of Mr. and Mrs. Pettifor during their stay in the parish. Mr. Pettifor had filled the positions of rector's warden and lay-reader, had given very efficient and painstaking service and gave most generously financially. Mrs. Pettifor had been a most loyal member of St. Alban's choir, and secretary of the Guild.

The Rector thanked them both personally and in behalf of St. Alban's congregation wished them every blessing in their new sphere of work.

WEDDINGS

DEANE-D'APPOLONIA
The Holy Cross church, Creston, was the scene of a pretty wedding on Saturday, April 27, when Edith Olga, eldest daughter of Mr. and Mrs. John S. D'Appolonia, became the bride of Donald E. Deane, of Calgary.

The bride, given in marriage by her father, entered the church to the strains of the wedding march. She was charmingly attired in a gown of white chiffon with a veil of white net. A necklace of pearls, a gift from the groom, was her only ornament, and she carried a bouquet of lilacs and carnations.

The Misses Elsie and Irma D'Appolonia, attending the bride, were dressed in floor-length gowns of blue chiffon with matching chapel veils. Mr. J. A. C. D'Appolonia and Mrs. Sidney Whitestone attended the groom.

A reception was held at the bride's parents' home at which time twenty-four guests were seated at the bridal table, which was graced by a three-tiered wedding cake.

The bride and groom left for a honeymoon to be spent at various points in the United States. For travelling the bride chose a gold wool suit with brown accessories and a corsage of pink carnations. On their return they will reside in Calgary.

Out-of-town guests included Mr.

Wm. D'Appolonia, of Vancouver; Mr. and Mrs. E. D'Appolonia, of Coleman; Mr. Sidney Whitestone, of Edmonton; and Mr. and Mrs. J. A. C. D'Appolonia and Marilyn, of Coleman.

NES PROGRAM FOR SUMMER VACATION EMPLOYMENT OF STUDENTS

During the summer vacation period many employers and industries are short staffed and are in need of employees to fill the gap created during this period.

Students of the higher grades of high school, college and university undergraduates will be seeking summer employment. The National Employment Service program is designed to arrange and facilitate the employment of students during the vacation period.

All employers will be canvassed for their employment needs and schools will be visited and arrangements made for registration of students who express their desire for employment during the vacation period.

This is not a compulsory meas-

ure, but a service of the national employment office for the employer and employee in locating and placing labor requirements and suitable work for student applicants.

ELKS HELD LADIES' NIGHT

Coleman Elks were hosts to their ladies in the 100F hall on Thursday last. Whist winners included Mrs. J. Kostechnik, Mrs. J. Lowe and Mrs. Bert Bond. Gentles: Mr. Bert Bond, Mr. George Jenkins and Joe McIntyre jr. The door prize was won by Mrs. S. Krzywy.

WORLD HAPPENINGS BRIEFLY TOLD

Application has been made for construction of a £225,000 (\$2,512,500) penicillin factory in Glasgow.

The former Methodist chapel in London Street where Charles Dickens gave a reading of his Christmas Carol is to be sold.

A cenotaph in memory of Franklin D. Roosevelt was unveiled in the National Cathedral of Greece on the anniversary of his death.

Group Capt. Douglas Bader, legless as a result of wounds in the Battle of Britain, has left the R.A.F. combat flying, has left the R.A.F.

The governor-general sent greetings and best wishes on behalf of the people of Canada to Princess Elizabeth on her 20th birthday.

The village of Middleton, England, will stay blacked out for another year because the annual parish meeting decided street-lighting "was not essential."

The Royal yacht Victoria and Albert, used as an overflow accommodation ship during the war, is too old and unseaworthy to be made fit for her pre-war duties, it is stated authoritatively.

Viscount Alexander is 55th of a line of governors-general of Canada which goes back to Champlain, who assumed office in 1608. He is the 17th since confederation.

Fishermen trawling in Dungeness Bay at Hythe, England, complain of heavy damage to nets from sunken remains of flying bombs and aircraft shot down in that area.

Built Mission Church

Eventful Blacksmith Worked Ten Years And Spent Lifetime Savings

An eccentric blacksmith's dream of promoting religion in a troubled world has been shattered by two spinners with whom he lodged until his death 18 months ago.

Ten years ago Isaac Bennett of Stockport, England, began to pour his lifetime savings into building single-handedly a church which he called "Harvest Home." While Bennett labored—sometimes through the late night hours—local people assumed he was building a garage.

Employing elaborate improvisations, the elderly railway blacksmith gradually constructed an 80-pew church with wood carvings, pulpit, harmonium and reading desk. The pews were converted bus seats and some of the decorations for the church were vest buttons and tin can lids expertly turned into decorations.

Heartened by the friendship of Betty and Florence Marsland in whose home he lived, the painstaking builder and would-be contributor to world reform provided in his will that in case of death, "Harvest Home" would become the elderly smith's property.

Betty Marsland recently said "He intended it for use as a mission church but it is impossible to carry out his plans."

The spinners have sold the pews as garden seats and given away the pulpit, harmonium and reading desk. They have not decided what to do with the building.

"We may sell it," they say.

Used To Be Custom

Giving Thanks For Food Was Once Common Domestic Rite

There was a time when on this continent it was a very general custom to give thanks to the Creator before partaking of the family meal. This once common domestic rite was known as "asking the blessing."

It is probable that only a very small portion of the homes on this continent now ever hear such a blessing invoked. Rules of politeness may be enforced but there is a widespread impression abroad that thanks are due to nobody in particular for the fact there is food on the table.

We hear of starvation in other lands but the general feeling in the homes of North America is that enough of bread and meat, etc., is their inalienable right and their inviolable prerogative. There is no widespread alarm or anxiety concerning the future, no fear that famine or severe food scarcity evil will be felt in our favored continent.

The old idea that Providence sends us food and all good things has disappeared from, perhaps, the great majority of homes. And this is at a time which in the memory of the oldest of us is unprecedented for world alarm over the matter of daily bread.—Fort William Times-Journal

Called For Encore

He had difficulty spanning an octave and reaching the piano pedals, yet Shane, 10, son of Canada's governor-general, during a concert on the liner Aquitania, played the "Bells of Scotland" so well that his audience, comprised mostly of wives and children from Britain for new homes in Canada, called for an encore, followed by "For He's a Jolly Good Fellow."

Both the halibut's eyes are on its right side. 2670

A National Need

Canada Can Use Men With Moral And Spiritual Leadership

Of all men, it is the historian, perhaps, who is best able to look objectively upon human affairs, finding in what is happening today a significant resemblance to what happened, it may be, many centuries ago. He may not subscribe altogether to the popular belief that "history repeats itself." But he will probably admit that an unbroken chain of cause and effect can be traced throughout the recorded history of mankind. To him, tribes and races, nations, empires and civilizations themselves are living organisms that wax and wane, subject to laws of growth and decay, sensitive to internal and external pressures, plant-like in their need for continuous cultivation if they are to remain sturdy, fruitful and long-enduring.

Every human society has within itself the seeds of its own dissolution. And harking back, perhaps, over the centuries to the glory that was Greece and the splendour that was Rome, our historian would point to moral decay—the general lowering of standards of human conduct—as the dry rot which, in the plenitude of their power, insidiously sapped the very foundations of mighty nations, laying waste the triumphs and achievements of centuries. These thoughts come to mind with the receipt of a booklet issued by The United Church of Canada and entitled "Canada Needs These Men." It sets forth the pension needs of the church's aged ministers and dwells, too, upon the necessity of encouraging young men entering the ministry on meagre salaries that won't permit saving for old age. The booklet tells of the many good reasons for the nation-wide United Church Pension Fund drive, from April 28th to May 10th, to place the fund on a "sound, actuarial basis."

From the editorial desk, the significance of this appeal appears to extend far beyond the necessary alleviation of the financial plight of ministers. The only possible conclusion to be drawn from much that is happening in Canada is that it emphasizes a national need for moral and spiritual leadership. Canada needs these men—whatever their creed, denomination or religious affiliation.

A Great Help

Public Hardly Realizes What Science Is Doing For Farmers

Thirty-one Dominion experimental farms, stations and sub-stations form the most comprehensive system of its kind in the world. The value of that system is not always realized by the public; nor the great extent to which science can and does help the Canadian farmer.

The range of scientific inquiry on a single experimental farm is extraordinary. Its activities vary from the development of early maturing varieties of vegetables intended to be more resistant to disease, to the production of harder prairie roses; from the best kind of cherry jelly to the inbreeding of field corn.

A typical farm lately was engaged, among other activities, in purifying new selections of tomato, egg-plant, pepper, melon, lima bean and pea cresses. It was seeking to make melons more adaptable to prairie conditions; to discover what the effect of irrigation of the vegetable garden in summer had upon onion production; to test apricots imported from Manchuria for their suitability for canning; to produce new lines by the inbreeding and hybridizing of field corn; and to harvest more than one hundred selections of hybrid wheats. In poultry the laying flock average was brought up to 246 eggs per bird.

These are just a few random selections of the activities of the Dominion experimental farms to show how great is their economic value to the nation. Ottawa Citizen.

Fair Exchange

Gifts Were Swapped At The German-Swiss Border

When the Nazis were in power, German soldiers assigned to patrol the Swiss border made no effort to conceal their contempt for the stolid men facing them across the barricades.

One day they handed across the barricade a handsomely wrapped box addressed to the Swiss commanding officer. The Swiss were not surprised to find the contents of the box to be fertilizer.

Next day, a similarly handsome box was presented by the Swiss to the German commander who grunted about Swiss lack of originality and turned it over, unopened, to an orderly.

The orderly returned shortly, amusements on his face. In his arms was the package containing a large platter of golden Swiss butter.

The enclosed card read: "The ceremony you have initiated is altogether proper. Let us conclude to the effect that each other the best from our lands."—Empire Digest.

Many long-winged, short-legged birds need room for a take-off like an airplane before they can get up into the air.

Spectacles were invented by a monk in Florence, Italy, in 1135.

FARMERS BID FOR RECONDITIONED TRACTORS: Ten thousand farmers from Manitoba, Saskatchewan and Alberta brought Yorkton, Sask., the busiest day in its history when Albert Houston, Chapman, Ont., auctioned off 69 reconditioned tractors. Bids were \$200 to \$1,000 above new prices.

Awarded George Medal

Belgian Woman Helped Hundreds Of Allied Servicemen To Safety

The Comet Line ran from Belgium overland across the Pyrenees to Spain, and along it hundreds of Allied airmen, soldiers, and sailors were helped to safety from German-occupied Europe. The "Line" was not so much a route as a chain of inflexible human purpose, and a 29-year-old Belgian woman, Mile. Andree de Jongh, who was one of its most devoted human links, was invested by the King with the George Medal for "outstanding gallantry and tenacious devotion to the Allied cause."

Slight, fair-haired, pretty, Mile. de Jongh left a commercial school where she worked as an artist to make 34 perilous journeys to the Pyrenees and back to Belgium, guiding 180 men to safety. In one emergency when there was no boat, she swam the Somme 20 times to help across non-swimmers.

Her father, a schoolmaster, who worked for the "Line" in Paris, was arrested and shot. She dodged the Gestapo until 1943, when she was caught and sent to Germany, to the glacially contracting camps at Ravensbruck and Mauthausen. Her sister Suzanne was arrested—the sisters met in a concentration camp. Her mother was imprisoned. She was one Belgian family's contribution to the war.—Manchester Guardian.

In A Milk Bottle

Message That Was Fished Out Of The Pacific Ocean

During the tense interval after Pearl Harbor, a milk bottle containing a piece of water-soaked paper was fished out of the Pacific Ocean.

The writing was too faint to be deciphered, but it was plainly a case for the FBI.

Various tests were made and various acids applied. At last six words stood out clearly. They read: "Two quarts of milk, no cream."

The cabinet of gems, Florence gallery, Italy, contains a cherry stone on which is carved a chorus of stunts in which 70 birds may be counted.

LIFE'S LIKE THAT

By Fred Neher

"Guess what happened to me in your new slacks?"

REG'LAR FELLERS—Keep Out Of Debt!

Long Flights

Birds From Canada Travel Great Distances, We Are Told

The aeroplane is rapidly converting man into a cosmopolitan traveler—a status long enjoyed by the inveterate travelers, the birds.

L. L. Snyder of the Royal Ontario Museum states that some of our common shorebirds nest within the Arctic circle in the summer, and yet, in our winter, are to be found at the opposite end of the earth. The Least Sandpiper, for instance, a sparrow-sized bird, may nest in northwestern Alaska in summer and spend the rest of the year in the tip of South America. Very great distances are travelled also by certain plovers and sandpipers.

Distance is not the only remarkable feature of the annual flights of shorebirds. As a rule, adult birds migrate separately, departing before the young birds.

Canadian shorebirds may visit Europe and Asia as occasional strays turn up in England. Some which nest in the Aleutian Islands of Alaska may regularly go south via the Asiatic coast.

Goes To Scrap Yard

Veteran Of Britain's Battleship Fleet Makes Last Voyage

H.M.S. Iron Duke, 24-year-old veteran of Britain's battleship fleet, was refloated after being beached in the Orkneys since October, 1939, to sail on her last voyage to the scrap yard.

Iron Duke, flagship of the British grand fleet in the Battle of Jutland in 1916 when she flew the flag of Admiral Jellicoe, was damaged by German aircraft in the early days of the Second Great War and has since lain useless, waiting to be sold as scrap.

Bating with forks was not known in England until the reign of James I.

OUR COMPLETE SHORT STORY—

LOOSE TALK

By MARY REDDING

Copyright
Wheeler Newspaper Syndicate

THIS is the beginning of the end," lamented the husky-voiced vocalist as she stood, shimmering in a gold sequin gown, at the centre of the spotlight.

"Yes, this is the beginning of the end," thought blonde Nikki Howard as she watched the torch singer from a table at the Chez Paris which she shared with her tall escort, Ted Krenworth.

Nikki looked away from the singer. She turned her head so that Ted would not notice the tears that glistened in her eyes.

She had never expected Ted's homecoming to be like this. For over three years she had looked forward to V-J Day and his release from the air force. He had looked so handsome in his officer's uniform, and when he went overseas as first pilot aboard a bomber she was proud, frightened and sad. She was proud because he was going to fight Hitler's gangsters, frightened because of the dangers, and sad because she would miss him so very much.

She remembered how happy she was when she pinned his silver wings on his tunic and how thrilled she was when he presented the same original wings to her after the graduation ceremony. Two months later he had placed a beautiful, sparkling diamond ring on her third finger left hand.

Although she wanted to marry him before he went overseas, Ted asked her to wait. He always said that it would not be fair to her if he should fail to return. Nikki involuntarily shuddered. How she had missed him during those dark months when he skillfully piloted his Flying Fortress through the dense fog and over Germany.

And now all those days of agony were over. Ted, wearing his own honorable discharge button, was sitting close to her and holding her hand. This was the moment she had dreamed about so many, many years. But was it? Was it not, as the vocalist chanted, the beginning of the end?

Nikki looked at Ted's firmly cut profile, at his dark hair and expressive black eyes. If only Catherine had not revealed the truth about him! Three weeks ago Catherine told Nikki there was something she should know because it concerned Ted. Catherine's husband, Bill, was Ted's co-pilot.

"Now this might not be as bad as it seems, dear," Catherine explained. "But you can never know too much about a man before you marry him. Bill wrote that Ted was going out with a nurse in England. He said that he had taken her out several times and that they seemed to be very friendly toward each other. He told me not to tell you because it might hurt you, but I felt that I must. Remember, it's better to be hurt before marriage than after, my dear."

At first Nikki would not and could not believe it. And then she re-read Ted's letters, so carefully saved. Yes, it did seem as though he was hinting something. She had cried herself to sleep.

And when Nikki greeted Ted at the station, she knew at once that

he wasn't her Ted, wasn't the same laughing pilot she had known. He was older and serious.

"What's going on in that mind of yours, darling," Ted interrupted. "You look as if you've been trying to solve all the world's problems in one sitting."

Nikki smiled. How could she tell him? She couldn't just accuse him of being untrue.

"Now the floor shows over, let's dance?" said Ted, dancing. "There's something I've been meaning to tell you for a long time."

Nikki's heart began to pound.

"One night on a mission I picked up some flak in my side and was in hospital a month. I didn't tell you because I thought you might worry. There I met the nicest Red Cross nurse who took excellent care of me." He grinned.

Nikki's face reddened. So Catherine was telling the truth after all. "I found her home is near here, and that her husband is an architect."

"Her husband?" Nikki. "Why, yes. In our talks, she kept raving about him and I about you, my pet. She's about 10 years older than we are, but I'm sure you'll like her. Will you go with me?"

Nikki's heart began to sing. Just a stupid woman, she thought as she nestled her head close to Ted's shoulder. And when she could trust the tears in her shining eyes: "I'd love to see them, darling."

GARDEN

NOTES

Water Well And They Will Live
The secret of success in transplanting lies in keeping roots moist and so far as possible excluded from the air. No matter if the article being transplanted is a tiny seedling or a ten foot ornamental tree that same rule applies. It is not the shock of moving so much as the roots drying out that kills.

To prevent this, nurserymen pack all roots carefully, using damp moss, and then to make doubly sure they wrap tightly in burlap or oiled paper. When this nursery stock is hauled it should be kept in a cool, moist place until planted and, if possible, in the case of big stuff like shrubbery and trees sprinkle some water over the packed roots to keep them moist.

In moving plants from one location to another in the garden it is advisable to dig carefully, keeping as much soil attached to the roots as possible, planting quickly in the permanent position, firming new soil tightly about the roots, and watering. Again this advice holds no matter how small or how big the plant being moved.

For Special Positions

In the seed catalogue will be found flowers that actually prefer dark corners, in fact will not grow if exposed to full sun from morning till night. And these flowers often have brilliant coloring too. The tuberous rooted begonia is an example. Then there are flowers like portulaca that prefer a blazing sun and poor, dryish soil. Listed in every good Canadian seed catalogue are hundreds of others sufficient to meet almost any conditions—dry, wet, dark or sunny.

Where Space Is Short

Those unfamiliar with gardening are amazed at the amount of vegetables a plot a few yards square can produce. Handled properly a piece of ground 12 feet wide and 25 feet long should yield practically all the vegetables, except potatoes, a small family will require from early July until frost.

For ease in cultivation, rows should run across the width, not the length of the plot, and they can be as close together as 12 inches for lettuce, narrow and early stuff like lettuce, radish and carrots, about 15 inches for beans and beans, and 18 inches for corn and tomatoes. To save room and induce early and clean fruits the latter should be staked with all side branches pinched off.

Space can be saved by alternating early vegetables like radish, spinach and lettuce with later maturing sorts like beets, carrots and onions. By the time the second group really require all room the first will have been removed and eaten.

The tallest smokestack in the British Empire is located at Copper Cliff, Ont. Made of brick and weighing 15,000 tons, it stands 510 feet high and has an inside diameter of 65 feet at the base.

VERY CONVENIENT

Idea Of Growing Dwarf Vegetables Fine For Limited Space

When the city dweller boasts this spring how well his sweet corn or tomatoes are coming along, it will not mean that he has exchanged his six-stories-up, four-rooms-and-bath apartment for "a little place in the country." He may merely be one of those who have sent for some of the dwarf vegetable seeds now being advertised.

Horticulturists are already well acquainted with the modest fruit tree and gardeners with Lilliputian sweet corn. And now seedsmen are putting on the market such agronomic innovations as finger-length cucumbers, flower-pot tomatoes, and vest-pocket varieties of the modest water-melon which is seven inches long, six inches in diameter, and weighs three pounds. The latter should find considerable favor with the housewife, one of whose summer problems is crowding a 20-pound melon into a family-size refrigerator.

Although the idea is new, the growing of dwarf vegetables seems to be eminently practical. It should enable some thousands of big-city dwellers who have the gardening urge but are hampered by lack of tilling space to cultivate vegetables in an oversize flower box. Soil of the desired fertility and texture may be easily secured, and weeding and watering should be but a matter of moments. Imagine reaching out of one's window and picking home-grown roasting ears! — Christian Science Monitor.

India's Millions

China Is Only Country That May Have More People

In 1941 there were approximately 339 million people in India, almost as many as in the whole of Europe west of Russia, and nearly three times as many as in the United States.

Today the total must be over 400 million. Since the population of the world is roughly two billion people this means that one-fifth of the human race, one person in every five, lives in India.

The only country in the world that is thought to have more people than China, but no census has been taken there in recent times.

\$70,000 BULL ARRIVES IN SAINT JOHN, N.B.—Five hundred dollars wouldn't buy a hair on the tail of Pittodrie Upright, a Shorthorn bull which has arrived in Saint John, N.B., from Scotland. Known to Scotsmen as the "baby bridegroom," Pittodrie Upright cost his owner, Ralph Smith, Missouri rancher and lumber king, nearly \$70,000, and the total bill will probably amount to \$100,000 before he takes up residence at the Sni-Bar ranch. Insurance alone cost about \$5,000. To justify his owner's huge investment, young Upright is expected to produce 50 to 70 calves a year, and his breeding life is expected to last six or seven years. Down in Missouri he will hobnob with pedigree Shorthorns of aristocratic breeding from Scottish herds. Owner Smith hopes that he will promote U.S. commercial cattle of the finest quality in the rich Missouri valley land. Meanwhile, Upright hopes that his reputation as "the best Shorthorn bull in all Scotland" will carry some weight in the U.S.

FORTUNE IN WOOL

Estimates Place Value Of British Holdings At Over \$500,000,000

Wool has always been of such vast importance to British trade that more hundreds of years ago that anybody knows a sack of wool was furnished for the Lord Chancellor to sit on when presiding over the House of Lords, as a symbol of that importance. Today the Lord Chancellor still sits on what is called the "Wool-sack" which is an oblong cushion stuffed with wool and covered with a red cloth.

Today it is estimated that there is over \$200,000,000 worth of wool in the warehouses of Yorkshire and Lancashire, or awaiting shipment to Britain from Australia and other countries, to be ultimately made into the textile suits and fabrics for which Britain is famous. Although Britain owns enough wool to keep the mills busy for perhaps 15 years, Britain has contracted to buy the entire Australian wool crop for the next ten years.

A Bradford manufacturer states that the textile factories are deluged with orders and even if they were able to operate at full capacity they could not catch up for years. Scientists have been at work to develop new fibres and designs, and a Yorkshire manufacturer says that the products of tomorrow will make women's eyes pop out of their heads with their shimmering lustre and spider-web texture.

Right now the factories could do with 70,000 more employees, but labor is still a bottleneck. — St. Thomas Times-Journal.

The Last North

Building Of The Alaska Highway Opens Up A Vast Area

We should always remember that the building of the Alaska Highway opened up a vast area of country previously inaccessible and almost unexplored. The resources of this region are still largely unexplored, but they may prove to be very substantial. With a good road available, and wartime controls relaxed, we may expect an influx of prospectors, timbermen, and others anxious to "speak out the land." What discoveries they may make no one can now predict.

The possibilities of the prairies and of southern British Columbia were not appreciated until the railways opened them to travel and settlement. The Alaska highway may be destined to play a similar role in the northland. Edmonton Journal.

Explosive Mines

Coast Of Britain Expected To Be Cleared By June Or July

The British Admiralty announces that the coasts of Britain will be cleared of explosive mines by June or July of this year. The northwest waters of Europe will not be "completely safe" until the summer of 1947. Since the end of the war these waters have been sunk or crippled 72 merchantmen or fishing boats. We never had so many mines on this side of the Atlantic but we did have some. The late Herr Hitler's submarine captains did what they could. Mines had to be used for harbor protection, and some of these may have gone adrift. New York Times.

Time To Worry

In Summer Time Men Have No Place To Carry Things

Now comes the time of year when we look forward with trepidation to the days when carrying things becomes a problem. Before many weeks have gone by, we shall have discarded the vest, that most useful of all articles of male attire. Transportation of small articles will become one of the major complexities of life.

Even worse, in this climate, is the problem when one decides to go without a coat, which is becoming a more and more general fashion. Then, indeed, there is no place to carry things. Pencils, pens, notebooks, cigarettes, each presents its individual complication. If one wears spectacles, the case for them adds to one's troubles. Pipe-smokers are in even more of a dilemma.

We men are complacently contemptuous of the jammed handbags carried by the feminine section of the population. The time is coming, however, when we shall be envying them these handy gadgets, as we do every year. — Windsor Star.

SMILE AWHILE

"This bouquet is too costly. You must take it back to the captain," said the rich fiancée.

"That's all right, miss. Since my master has been engaged to you he has been able to get things on credit," replied the valet.

"Will you stop drinking for me?"

"Who said I was drinking for you?"

"How do you succeed so well in getting back the books you lend?" a thoughtful young professor was asked.

"Simple enough," replied the young man. "In each book I lend I write this message: 'I like you, so I loaned you this book. If you like me, you'll return it.'"

A farmer wrote to an agricultural paper to ask "how long cows should be milked."

"Same as short coars," advised the editor.

Teacher: "Now, Freddy, why does a polar bear wear a fur coat?"

Freddy: "Other, well I suppose he would look funny in a tweed one."

Gaskin: "Isn't it going to be rather expensive entertaining your aunt for a week?"

Parks: "Not a bit. In our district there are three christenings, two weddings and a funeral, all on different days."

Briggs: "You say that your wife won't to college before you married her?"

Griggs: "Yes, she did."

Briggs: "And she thought of taking up law, you said?"

Griggs: "Well, but now she's satisfied to lay it down."

Mother: "Do you know what happens to little boys who tell lies?"

Johnny: "Yes, mother; they travel for half fare."

"You did learn to cook in the Army, didn't you?" asked the girl.

"Yes, I did," nodded the boy.

"Good. Mother wants to invite you over for dinner Sunday, if you promise to make the gravy."

Dennis was taken to his first harvest festival. Among the offerings of fruit and flowers, the bunches of purple grapes on the pulpit took his fancy.

When the offertory box came round he put in silverware and said confidently, "Grapes, please."

Neighbor (sympathetically) — "And I know how long these years must seem to you."

Deserted Wife: "Yes, but I remember when he left just as if it had been yesterday—how he stood at the door holding it open until six flies got into the house."

HEADS R.C. INSTITUTE—C. F.

Publow of the Hydro-Electric Power Commission of Ontario was elected president of the Royal Canadian Institute at the 97th annual meeting in the Royal Ontario museum. Mr. Publow was born in Pilot Mound, Man., where he attended primary and secondary schools. He was graduated from the University of Toronto in 1908 as an electrical engineer and received his degree of Bachelor of Applied Science in 1909. Mr. Publow served as a member of the council for the institute for three years, and last year was appointed second vice-president. He is a member of the American Institute of Electrical Engineers and has served on its automatic generating stations committee for a number of years.

LOCAL NEWS

Mrs. A. Kahout is confined to her home due to illness.

Bob. Pattinson has been confined to his home this week due to a severe attack of the flu.

Mrs. Lal. Snowdon visited relatives at Pincher Creek last week.

Mrs. S. DeKleyen has purchased a new 3-ton truck from Sentinel Motors.

Dr. Hope Gill was a Calgary business visitor for a few days during the week.

Mrs. J. McIntyre, of Claresholm, is the guest of her daughter, Mrs. M. McGrath.

Mrs. Charles Routhead, of Red Deer, spent the Easter holidays at her home here.

The roof of the local bank is being shingled this week by contractor Joe D'Appolonia.

Mrs. Valerie Borato has completed her hairdressing course at Lethbridge and has now returned home.

Mr. and Mrs. A. Fry visited in Calgary last week.

Mrs. H. Wilton and daughter, of Nelson, are the guests of the former's parents, Mr. and Mrs. T. Flynn.

Mrs. M. E. Cornett entertained at three tables of bridge on Friday evening. Honors were won by Mrs. E. Richards, Mrs. W. Milley and Mrs. R. Derbyshire.

Neil and Jimmy Andrews left two weeks ago for the west coast where they plan on residing. The two young men starred for the local intermediates during the past season.

Corporal Pat. Emmerson is visiting her parents, Mr. and Mrs. Joe Emmerson. She plans on leaving Friday for Winnipeg where she will secure her discharge from the RCAP(WD).

Mr. Jesse Hirst, who had been visiting his home here, returned to Belcher hospital on Monday of last week. He was accompanied to the city by Mrs. Hirst who returned home on Friday.

Mr. and Mrs. A. Jones and Mr. and Mrs. R. Foster and young daughters were Calgary business visitors last week.

Mr. and Mrs. Jack Sudworth and two children left on Saturday for Vancouver where they will make future residence. They had returned here from the coast several months ago and Mr. Sudworth had gained employment at McGillivray.

Andrew Harry wore a great big grin on Tuesday afternoon. When The Journal reporter caught up to him he had just come out of the hospital where the doctor had taken the cast off a leg fractured some weeks ago. "Gosh, what a relief," sighed Andrew as he moved the limb up and down.

Mr. William D'Appolonia, of Vancouver, is the guest of his nephew and niece, Mr. and Mrs. Joe D'Appolonia. He resided in Coleman from 1904 to 1918 and during that time was an employee of McGillivray Creek and International, finally becoming a coal sampler. At the present time he is foreman at a sawmill on the west coast.

HOSPITAL PATIENTS

Patients in the local hospital this week are Mrs. F. Beart, Mrs. Ti-berghien sr., Mrs. Harry Gate, Mrs. Walter Blyth and Mrs. Cecil Milley.
